

Project Details: Sample Project

Ilyass Jebraoui

1 Project Overview

This document provides detailed information about the Sample Project, a web application built to demonstrate modern web development techniques.

2 Description

The Sample Project is a responsive portfolio website designed to showcase professional projects. It features a clean UI, interactive elements, and optimized performance.

3 Technologies Used

- HTML5, CSS3, JavaScript
- Framework: Bootstrap
- Hosting: Vercel
- Version Control: Git

4 Challenges

- Ensuring cross-browser compatibility
- Optimizing load times for large images

5 Outcomes

The project was successfully deployed at <https://ilyassjebraoui.tech> and received positive feedback for its design and functionality.
